DETAILED ACTION

Drawings

The drawings filed on 3/19/04 are informal, since the letters, numbers and lines are not uniform in nature throughout the Figures.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nitzberg et al.

In regard to claims 1, 4 and 5, the Nitzberg et al. reference discloses A fuel dispenser having a fuel hose "breakaway assembly" 34 (Fig. 2) comprising in combination: a fuel dispenser having an outlet (Fig. 1), a "fuel nozzle" 32 attached to a "fuel hose" 22, said "fuel hose" 22 being connected to the dispenser outlet through a breakaway assembly, said breakaway assembly comprising, an "inner ball-shaped valve section" 40 coupled with an "outer socket-shaped breakaway section" 38, as claimed.

In regard to claim 2, see "semi-spherical valve body" 42 in Figure 2.

In regard to claim 3, see "threaded bushing" 44, a "ball seal" 90, a "spring" 110, and "o-ring" 100. Further, see column 5, lines 13-16.

In regard to claim 6, see "stand-off profiles" 106.

In regard to claim 7, see "ball seat" 102.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Podgers and Johnson et al. references pertain to various breakaway valve assemblies, similar to Applicant's device.
